Atty Dkt. No.: SHIM-018 USSN:

## THE CLAIMS

- 1. (Original) A polynucleotide encoding a cytolethal distending toxin, which is any one of:
- (a) a polynucleotide encoding a polypeptide comprising the amino acid sequence of any one of SEQ ID NOs: 2 to 4;
- (b) a polynucleotide comprising any one of the nucleotide sequences of position 1 to 777, 802 to 1605, and 1615 to 2187 in the nucleotide sequence of SEQ ID NO: 1;
- (c) a polynucleotide encoding a polypeptide comprising an amino acid sequence with a substitution, deletion, addition, and/or insertion of one or more amino acids in any one of the amino acid sequences of SEQ ID NOs: 2 to 4;
- (d) a polynucleotide that hybridizes under a stringent condition to DNA comprising any one of the nucleotide sequences of position 1 to 777, 802 to 1605, and 1615 to 2187 in the nucleotide sequence of SEQ ID NO: 1;
- (e) a polynucleotide encoding a polypeptide comprising the amino acid sequence of any one of SEQ ID NOs: 52 to 54;
- (f) a polynucleotide comprising any one of the nucleotide sequences of position 1 to 702, 778 to 1629, and 1632 to 2177 in the nucleotide sequence of SEQ ID NO: 51;
- (g) a polynucleotide encoding a polypeptide comprising an amino acid sequence with a substitution, deletion, addition, and/or insertion of one or more amino acids in the amino acid sequence of any one of SEQ ID NOs: 52 to 54; and
- (h) a polynucleotide that hybridizes under a stringent condition to DNA comprising any one of the nucleotide sequences of position 1 to 702, 778 to 1629, and 1632 to 2177 in the nucleotide sequence of SEQ ID NO: 51.
  - 2. (Original) A vector comprising the polynucleotide of claim 1.
- 3. (Original) A host cell containing the polynucleotide of claim 1 or the vector of claim 2.

USSN:

4. (Original) A polypeptide encoded by the polynucleotide of claim 1.

5. (Original) A method for producing the polypeptide of claim 4, which comprises the step of culturing the host cell of claim 3 and collecting the produced polypeptide from the host cell or the culture supernatant.

- 6. (Original) An antibody that binds to the polypeptide of claim 4.
- 7. (Original) A method for detecting the presence of *Campylobacter* bacteria in a test sample, which comprises the steps of:
- (a) conducting a nucleic acid amplification reaction on the test sample using a common primer pair that can amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter* bacteria; and
- (b) determining the presence of *Campylobacter* based on the presence or molecular weight of an amplified fragment from the genomic DNA encoding the cytolethal distending toxin of *the Campylobacter* bacterium.
- 8. (Original) The method of claim 7, wherein the Campylobacter bacterium is Campylobacter coli, Campylobacter jejuni, and/or Campylobacter fetus.
- 9. (Original) A method for detecting the presence of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus* in a test sample, which comprises the steps of:
- (a) conducting a nucleic acid amplification reaction on the test sample using a mixture of primer pairs specific to each of genomic DNAs encoding the cytolethal distending toxins of these bacteria; and
- (b) determining the presence of the bacteria based on the presence or molecular weight of amplified fragments from the genomic DNAs encoding the cytolethal distending toxins of the bacteria.
- 10. (Original) A method for detecting the presence of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus* in a test sample, which comprises the steps of:

USSN:

(a) conducting a nucleic acid amplification reaction on the test sample using a common primer pair that can amplify genomic DNAs encoding the cytolethal distending toxins of these bacteria;

- (b) conducting a nucleic acid amplification reaction on the test sample or with the genomic DNA amplified in step (a) as a template using a mixture of primer pairs specific to each of genomic DNAs encoding the cytolethal distending toxins of the bacteria; and
- (c) determining the presence of the bacteria based on the presence or molecular weight of amplified fragments from the genomic DNAs encoding the cytolethal distending toxins of the bacteria.
- 11. (Original) The method of claim 7, 8, or 11, wherein the common primer pair is any one of

a primer pair comprising the sequences of SEQ ID NOs: 64 and 65, a primer pair selected from SEQ ID NOs: 7 to 10 and 47 to 50, a primer pair comprising the sequences of SEQ ID NOs: 66 and 67, and a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.

- 12. (Original) The method of claim 9 or 10, wherein the method uses (a) to (c) as the mixture of specific primer pairs:
- (a) a primer pair comprising SEQ ID NOs: 70 and 71 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair comprising SEQ ID NOs: 68 and 69 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and
- (c) a primer pair comprising SEQ ID NOs: 72 and 73 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 13. (Original) The method of claim 9 or 10, wherein the method uses (a) to (c) as the mixture of specific primer pairs:
- (a) a primer pair selected from SEQ ID NOs: 13, 14, and 28 to 36 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;

USSN:

(b) a primer pair selected from SEQ ID NOs: 11, 12, and 17 to 27 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and

- (c) a primer pair selected from SEQ ID NOs: 15, 16, and 37 to 46 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 14. (Original) The method of claim 9 or 10, wherein the method uses (a) to (c) as the mixture of specific primer pairs:
- (a) a primer pair comprising SEQ ID NOs: 76 and 77 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair comprising SEQ ID NOs: 74 and 75 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and
- (c) a primer pair comprising SEQ ID NOs: 78 and 79 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified said the primer pair.
- 15. (Original) A method for detecting the presence of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus* in a test sample, which comprises the steps of:
- (a) conducting a nucleic acid amplification reaction on the test sample using a common primer pair that can amplify genomic DNAs encoding cdtB subunits of the cytolethal distending toxins of these bacteria;
  - (b) digesting the genomic DNA amplified in step (a) with a restriction enzyme; and
- (c) determining the presence of the bacteria based on the molecular weight of a DNA fragment resulting from the digestion.
- 16. (Original) The method of claim 15, wherein the restriction enzyme is selected from the group consisting of: Sau3AI, DsaI, MboI, RsaI, EcoRI, HinfI, NdeI, PstI, XbaI, and XhoII.

USSN:

17. (Original) The method of claim 15, wherein the common primer pair is a primer pair selected from SEQ ID NOs: 7 to 10 and 47 to 50 or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.

- 18. (Original) A kit used in the method of claim 7 or 8, which comprises an instruction manual and a common primer pair that can amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter* bacteria.
- 19. (Original) The kit of claim 18, wherein the common primer pair is any one of a primer pair comprising the sequences of SEQ ID NOs: 64 and 65, a primer pair selected from SEQ ID NOs: 7 to 10 and 47 to 50, a primer pair comprising the sequences of SEQ ID NOs: 66 and 67, and a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 20. (Original) A kit used in the method of claim 9, which comprises an instruction manual and a mixture of primer pairs specific to each of genomic DNAs encoding the cytolethal distending toxins of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus*.
- 21. (Original) The kit of claim 20, wherein the mixture of specific primer pairs is as follows:
- (a) a primer pair comprising SEQ ID NOs: 70 and 71 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair comprising SEQ ID NOs: 68 and 69 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and
- (c) a primer pair comprising SEQ ID NOs: 72 and 73 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair:
- 22. (Original) The kit of claim 20, wherein the mixture of specific primer pairs is as follows:

USSN:

(a) a primer pair selected from SEQ ID NOs: 13, 14, and 28 to 36 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;

- (b) a primer pair selected from SEQ ID NOs: 11, 12, and 17 to 27 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (c) a primer pair selected from SEQ ID NOs: 15, 16, and 37 to 46 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 23. (Original) The kit of claim 20, wherein the mixture of specific primer pairs is as follows:
- (a) a primer pair comprising SEQ ID NOs: 76 and 77 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair comprising SEQ ID NOs: 74 and 75 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and
- (c) a primer pair comprising SEQ ID NOs: 78 and 79 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 24. (Original) A kit used in the method of claim 20, which comprises an instruction manual and the following (a) and/or (b):
- (a) a mixture of primer pairs specific to each of genomic DNAs encoding the cytolethal distending toxins of Campylobacter coli, Campylobacter jejuni, and Campylobacter fetus;

and

(b) a common primer pair that can amplify genomic DNAs encoding the cytolethal distending toxins of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus*.

USSN:

25. (Original) The kit of claim 24, wherein the mixture of specific primer pairs is as follows:

- (a) a primer pair comprising SEQ ID NOs: 70 and 71 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair comprising SEQ ID NOs: 68 and 69 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (c) a primer pair comprising SEQ ID NOs: 72 and 73 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 26. (Original) The kit of claim 24, wherein the mixture of specific primer pairs is as follows:
- (a) a primer pair selected from SEQ ID NOs: 13, 14, and 28 to 36 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;
- (b) a primer pair selected from SEQ ID NOs: 11, 12, and 17 to 27 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and
- (c) a primer pair selected from SEQ ID NOs: 15, 16, and 37 to 46 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 27. (Original) The kit of claim 24, wherein the mixture of specific primer pairs is as follows:
- (a) a primer pair comprising SEQ ID NOs: 76 and 77 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter coli*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair;

USSN:

(b) a primer pair comprising SEQ ID NOs: 74 and 75 to amplify genomic DNA encoding the cytolethal distending toxin of *Campylobacter jejuni*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair; and

- (c) a primer pair comprising SEQ ID NOs: 78 and 79 to amplify a genomic DNA encoding the cytolethal distending toxin of *Campylobacter fetus*, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 28. (Original) The kit of any one of claims 24 to 27, wherein the common primer pair is selected from a primer pair of the sequences of SEQ ID NOs: 65 and 64, a primer pair selected from SEQ ID NOs: 7 to 10 and 47 to 50, and a primer pair of the sequences of SEQ ID NOs: 66 and 67, or is a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
- 29. (Original) A kit used in the method of claim 15, which comprises an instruction manual and a common primer pair that can amplify genomic DNAs encoding the cdtB subunit of the cytolethal distending toxins of *Campylobacter coli*, *Campylobacter jejuni*, and *Campylobacter fetus*.
- 30. (Original) The kit of claim 29, wherein the common primer pair is a primer pair selected from SEQ ID NOs: 7 to 10 and 47 to 50, or a primer pair that can amplify the same genomic DNA region as amplified with said primer pair.
